SUMMARY

Financial Analyst with 2+ years of experience in **financial analysis, post-trade operations, and data-driven problem solving** supporting a top-tier North American investment bank. Proven ability to analyze complex financial datasets, perform reconciliation and break resolution, and support funding and reporting processes. Experienced in DTCC workflows, settlement, and treasury operations, with strong expertise in Excel, VBA. Recognized for driving **process improvements and enhancing data accuracy** in high-volume, time-sensitive environments.

TECHNICAL SKILLS

Financial Modelling & Valuation: DCF, FCFE, Comparable Analysis, CAPM, Pro Forma Modelling

Market Tools: Bloomberg Terminal

Data & Analytics: Python, RStudio, SAS, SQL, Power BI, Tableau, Alteryx, Qlik

Excel & Office: Advanced Excel (Pivot Tables, XLOOKUP/VLOOKUP), VBA/Macros, Word, PowerPoint

Systems: DTCC, Mainframe Platforms, Safecash

PROFESSIONAL EXPERIENCE

eClerx Services Ltd — Mumbai, India | Client: Morgan Stanley

Financial Analyst – Middle Office Reconciliation (Securities Lending & Prime Brokerage) | Feb 2022 – Apr 2024

- Performed daily reconciliation across 20+ accounts, analyzing cash and position breaks across bonds, cash, and derivatives to ensure **data accuracy and reporting integrity**
- Investigated and resolved 10–30 daily breaks through **trade-level analysis, transaction matching, and discrepancy identification**, improving reconciliation efficiency and data reliability
- Executed and validated high-value wire transfers (\$200M–\$500M/day) across domestic and international accounts, maintaining **99%+ accuracy and meeting strict T+0 deadlines**
- Monitored funding exposure and liquidity positions, supporting **treasury operations and risk awareness** through analysis of market activity and account balances
- Generated and analyzed secured funding and treasury reports (\$0–\$10B flows) using Excel and VBA, delivering **insights for funding decisions, reporting, and operational planning**
- Supported Prime Brokerage Billing by processing client charges and posting journal entries, ensuring **accuracy of fee calculations and financial reporting**
- Improved workflow efficiency through **Excel/VBA automation and process optimization**, reducing manual effort and enhancing turnaround time for reporting tasks
- **Tools/Systems:** SafeCash, Qwest, CTS, T3C, MIS, DTCC, Mainframe Systems, Advanced Excel (VBA/Macros)

FINANCE PROJECTS

ETF Market Flow Analysis, Tools: Bloomberg Terminal, Excel

- Analysed institutional ETF order flows using Bloomberg Terminal to evaluate liquidity dynamics in SPY and VOO
- Identified demand-side factors influencing short-term price discovery and ETF liquidity

Momentum Crashes and the 52-Week High Strategy Tools: Excel, Bloomberg Terminal, Fama-French Data

- Analysed equity pricing behaviour and momentum-driven return patterns using the 52-week high signal, evaluating pricing dynamics and downside risk.
- Worked with real-time market data to identify pricing inefficiencies and momentum reversals during volatile periods (e.g., S&P 500 correction)

EDUCATION

- **University of Delaware – Lerner College of Business & Economics**, Newark, DE
MBA, Business Analytics & Finance (STEM) — Expected Dec 2026
- **University of Mumbai**, Mumbai, India
